

SlatTrax[®]

Temporary road system for site access & ground protection

U.S. Patent No. 8,998,529

Advantages

- Smart alternative to overlapped plywood, mats, etc.
- Easy to deploy and retrieve
- Increase productivity (95% less time than plywood or mats)
- Less unnecessary labor results in more productivity & profit
- Avoid unnecessary injuries and make happier customers

Features

- Trax - durable 3/4" thick recycled plastics in 25' (or 12.5') sections
- Mainframe carries Trax and deploys them with hydraulics
- Roll out (and retrieve) 100' of Trax in less than 2 minutes
- Disconnect Trax sections and maneuver as needed
- System performs on turf, hardcover, hills and curves (<18' radius)

Simple to Operate (Skid Loader Option Shown Here)

Dispense Trax[™] with Hydraulics

Disconnect 25' Sections of Trax and Maneuver as Needed

Deploy with strapping and strapping fasteners up on hardscape.

Connect Trax to Spools - Back up and Begin Roll up of Trax

*Note: Some photos show original green color – transitioned to white October 2016 (lower temp on grass and improved visibility for operators).

Additional Product Information

System Width	Mini - 67"	Dual - 88"	Dual XL - 100"
Trax Width	Single @ 48"	Dual @ 36" Ea	Dual @ 42" Ea
Trax Coverage Width	48"	80"	92"
Trax L - System Wt.	75' - 1,134 lbs	100' - 2,065 lbs	100' - 2,400 lbs
Section L & Wt.	12.5' - 129 lbs	25' - 188 lbs	25' - 218 lbs

Additional Product Options

Mini Skid Loader

Compact Excavator

SlatTrax Trailer

SlatTrax® CUSTOMER FEEDBACK

SITE ACCESS • GROUND PROTECTION

“SlatTrax is a great product - easy to use and versatile. Your product has saved us countless man hours and minimized back strain.”

Brad Bendixen
State of Arizona, Dept. of Veterans Affairs

“The crew said that it was extremely easy to figure out and add trax as needed. In the pictures, we have 350 LF laid out on site. These are so worth the investment! We appreciate you getting these to us and following up!”

Judd Bryarly
Timberline Landscape, CO

“We have rented SlatTrax to customers who report great results including one who “would not have gotten the job without SlatTrax”. Another contractor used SlatTrax to cross the corner of a marsh –without damaging the environment. I have also used SlatTrax personally mounted on excavator to repair the bank of a pond wash-out. We see this product being of value to a wide variety of contractors and utilities.”

Brad Bowman, VP
Star Equipment Company, IA

“SlatTrax was a welcome addition to our site. Since all of our work is done on a golf course, we have to make sure we don’t damage the turf. We deployed SlatTrax to protect the edge of the cart paths and the grass from heavy forklift traffic, and the Trax held up great to any and all challenges.”

Joel Schaberg, PGA Operations Coordinator
2016 Ryder Cup, Hazeltine NGC
